

Moves & Relocations

We offer you an end-to-end solution

Moving or relocating your office(s) is a stressful undertaking. Even a company with an in-house IT department can find itself overwhelmed with numerous tasks. ITX has strong relationships with key partners and together, we offer you an **end-to-end** solution – from moving an entire office to relocating a data center, including:

- design and layout new server room
- network design
- wireless network design & implementation
- phone system design/implementation/relocation/provisioning
- testing/troubleshooting/reconfiguration/documentation
- Identify/label equipment in order to correctly reassemble
- verify or create network documentation
- order new equipment
- manage voice & data cabling
- identify power/cooling/fire prevention needs
- Telco/ISP selection & transition
- coordinate the physical move
- hook everything back up
- reconfigure routers, switches, IP addresses, DNS, etc.
- test workstations, networks, and Internet connections
